

ARE YOU READY FOR THE STORM?

New studies expect state budgets to be hammered by a surge in Medicaid enrollment, rising health inequities, and unmanaged Social Determinants of Health.

HEALTH INEQUITY

Women of color and their infants consistently experience **worse health outcomes** than white moms.

16%

16 percent of women of childbearing age are uninsured compared to 9 percent in states with expanded Medicaid

150K

Each year, **150,000 infants** are born in areas without a hospital or provider offering obstetric care²

THE PERFECT STORM

MEDICAID SURGE

A new study warns of **COVID-19's impact** on state budgets

73%

Enrollments are expected to rise by 55 million – a **73 percent increase** nationwide

20%

Revenues could **drop by 20 percent** while spending hits record highs – nearly half a trillion dollars¹

SOCIAL DETERMINANTS

80%

of health outcomes are **impacted** by Social Determinants of Health

90M

Health Literacy affects **90 million** Americans

Adequate housing **reduces** Medicaid claims by **55%** and ED visits by **24%**

1 in 8

1 in 8 **ED visits** are related to substance abuse and mental health and face **food insecurity**³
